

# Indane Gas

**Community Kitchen:-** For a family to avail LPG as a cooking fuel, they need to have at least one LPG cylinder, Regulator, Hot plate and Suraksha Hose.

The Below Poverty Line population in the country may not be able to afford the cost of these paraphernalia to become a LPG consumer. [indane gas connection](#) Though Marketing Companies have plans to subsidize initial security deposit of LPG cylinder and regulator, the low income customers may not be able to afford LPG refills.

In order to fulfill their cooking needs by sharing the infrastructure of a common kitchen, a new scheme of community kitchens have been developed. Such kitchens will be established and operated under the supervision of Panchayat of the village. In these kitchens, the customers will be allowed to cook their food on nominal charges. IOC will provide stoves, cylinders, regulators etc. for such kitchens if Panchayat or Hospitals provide the covered space and supervision of the day to day activities.

In case you need such kitchen in your village/nearby Government hospitals please contact your nearest Area Manager of IOC.

Cooking is something the best way to serve the family or anyone else. Generally the best way of charity is also supposed to be cooking and serving other people who could not afford to eat. Indane Gas is here to make your cooking a blissful activity. Now cooking would not remain a burden and a suffocating work. You would love to cook and eat in home. Indane Gas is launched in 1970 by Indian Oil. It is the world's highest gas station plant, about 3500 meters above sea. It is situated in Leh. Every second gas cylinder in India is Indane Gas cylinder. Let's have a look over its achievement:

- **Make Your Cooking a Blissful Treat with Indane Gas**

1. Advantages of Indane Gas: The traditional ways of cooking in both portions of country, in rural as well as in urban area are yet those traditional outdated method which are unhealthy and unhygienic. Mainly the health of that women is badly affected, as those fuel like dunk cakes, dry woods, kerosene oil and coal etc, produce lots of smoke. The smoke and non burnt particles of fuel which remain suspended in air get accumulated in lungs and hence causes many sever diseases.

LPG gas cylinders are an excellent substitute of it but because of expensive cost no one could afford it. Indane Gas has made it bring from an elite class kitchen to level society kitchen. It's no more a status symbol as every one could afford it.

2. How to Make Order: The order of a gas cylinder is very simple. The people who are too busy and couldn't find time to approach a local office for gas connection could make it through online mode. Indane Gas registration is very simple for everyone. The official website of [Indane Gas](http://www.IndaneGas.com) is **www.Bookindanegas.com**, over which anyone can book his order. Offline mode is also available for the people who could not book the connection through online way. Its very simple dial Indane Gas Consumer Care Number which is 1800-2333-555. Hence having an Indane Gas Connection is the easiest task in world.

3. Government Subsidies: The under privilege section of the consumers who have some extra benefits, if provided their Aadhar card facility the concession is given Indane Gas price and hence it follows all the necessary orders of the Govt. of India. The primary service is consumers' orientation and secondary is money making. That's the reason consumers don't like to switch to any other brand.

The credit of changing, the traditional and unhealthy time consuming cooking practice, should be given to Indane Gas. As this is the only domestic gas producer which is consumer oriented and profit making is secondary. So be healthy with your home cooked food.
